PROJECT EXPERIENCE

Hako: Web-Based Career Management System - Full-Stack Developer | 2026

- Developed a web-based career management application that helps job seekers track applications, interview progress, resume versions, and career notes in one centralized platform, with ATS Checker and Resume Health features to help improve resumes before applying for jobs.
- Built the application using ASP.NET Core (.NET 8), C#, React, Vite, Tailwind CSS, SQL Server, Entity Framework Core, and JWT authentication by developing REST APIs, implementing CRUD operations, and connecting the frontend and backend.

OrderQ: A QR Code-Based Ordering System for Dine-In Restaurants - Researcher & Documentation Lead | 2026 – Capstone Project

- Developed project documentation (Chapters 1–5), conducted user requirements analysis, and collaborated with the development team throughout the development process using React, Node.js, Express.js, MySQL, Tailwind CSS, PayPal, Git, and Figma.

MenuMatic: QR-Based Food Ordering Service Platform - WordPress Developer & Documentation Lead | 2024

- Developed and maintained a WordPress-based QR food ordering platform using WordPress, Elementor, HTML, and CSS by creating responsive website pages, managing digital menus and pricing plans, while collaborating with the development team on project documentation and implementation.

WORK EXPERIENCE

OJT Experienced, The Penthouse Hotel and Residences – Angeles, Pampanga | Feb 02, 2026 – April 11, 2026

- Performed network troubleshooting, router configuration, and technical support for hardware, software, printers, TVs, and CCTV systems while assisting with information system operations and database updates.
