PROJECT EXPERIENCE

OrderQ - A QR Code-Based Ordering System for Dine-In Restaurants

Researcher & Documentation Lead | 2026 – Capstone Project

- Developed project documentation (Chapters 1–5) by organizing system requirements, research findings, methodology, results, and recommendations to support project implementation.
- Conducted user needs analysis and technical research by gathering requirements and evaluating system objectives, resulting in improved alignment between restaurant processes and system functionalities.
- Collaborated with the development team in preparing technical reports, system documentation, and project deliverables using React, Node.js, Express.js, MySQL, Tailwind CSS, PayPal, Git, and Figma.

MenuMatic: QR-Based Food Ordering Service Platform

WordPress Developer & Documentation Lead | 2024

- Developed a WordPress-based QR food ordering platform using WordPress, Elementor, HTML, and CSS, enabling digital menu access, pricing management, and improved restaurant ordering efficiency.
- Customized website layouts, service pages, and user-facing features through Elementor and Hostinger while managing menu details, subscription plans, and pricing information.
- Prepared system documentation, technical reports, and project requirements while collaborating with the team to ensure proper platform implementation and functionality.

WORK EXPERIENCE

OJT Experienced, The Penthouse Hotel and Residences, Pampanga, Angeles | Feb 02, 2026 – April 11, 2026

- Monitored and troubleshoot network connectivity issues, configured routers, and maintained stable Wi-Fi services to support daily business operations.
- Provided technical support for hardware, software, printers, TVs, and CCTV systems while assisting with information system operations, database updates, and digital content management.
